GLOBAL ALUMNI MEET 2018

19th MAY 2018

National Education Society @

JAWAHARLAL NEHRU NATIONAL COLLEGE OF ENGINEERING

SHIVAMOGGA – 577204

**(Affiliated to VTU, Belagavi, Recognized by Govt. of Karnataka,
Accredited by NAAC and Approved by AICTE, New Delhi)**

Vision

To be a pacesetter institute in technical & management education and research for producing highly competent engineers, managers & entrepreneurs to meet the needs of industry and society

- **Impart quality education through flexible and innovative teaching - learning process**
- **Enable and ignite young minds to excel in their career and life with entrepreneurial spirit, professional ethics and human values**
- **Facilitate invention based research and collaborate with industries to address societal needs**

Mission

Quality Policy

- **Providing state-of-the-art technology support and best possible educational infrastructure**
- **Development of faculty through supporting policies and procedures towards achieving higher qualifications, short term courses, participation / presentations in seminars and conferences**
- **Encouragement to undertake research and consultancy, improving teaching-learning process by introducing innovative pedagogical and student interaction mechanism**

Secretary's Message

S. N. Nagaraja

Secretary
National Education Society (R)

On behalf of National Education Society, I am delighted to extend warm greetings to everyone attending the JNNCE's Global Alumni Meet-2018.

This reunion is an ideal opportunity for the alumni of JNNCE to renew old friendships with classmates and share fond memories. Your coming is a very significant event after a long journey to your life. Whatever you have become right now or whatever you achieve is a delighting experience that connects to your past, most specially to your "college life". Remembering your friends, teachers and cherish the happy moments together is fulfilling. As you mark this special occasion with friends and family, I encourage you to take this opportunity to reflect on the past with pride and look, with optimism, to the future.

Please accept my sincere best wishes for an enjoyable and memorable reunion.

Dr. H. M. Mahadevaswamy

Principal &
Honorary President-JNNCEAA

Principal's Message

Jawaharlal Nehru National College of Engineering (JNNCE) has kept the flame burning in the field of education from 1980 to the present. Thirty-seven years of active service is truly an extraordinary feat in the midst of unending educational reforms and innovation to ably cope with regulatory & industry standards.

It is with utmost joy and excitement that I welcome you all once again in this place - where you all had learned, grew and shared treasured moments together - our beloved JNNCE!

This first ever Global Alumni Meet also marks completion of JNNCE's 37th year of successful existence. As you come home to your beloved institution, you will see the various developments that had been materialized through the concerted efforts of our college administration, faculty, staff, students, alumni, the community and other stakeholders. As you witness a beautiful blend of the preserved past and the updated present on the JNNCE Campus, I hope you will feel proud to be a part of this prestigious Institution.

JNNCE Alumni Association has also been geared towards taking care of and giving back to its beloved JNNCE. This Global Alumni Meet seeks to provide the nostalgic ambience of a flashback... those were the days. You are free to relive memories of the past and take a jumpstart on making JNNCE a part of your plans for 2018 and beyond. Let us all come and celebrate this continuing association with your dear Alma Mater and continue our quest to help JNNCE and our fellow JNNCEans.

In this grateful spirit that I would like to thank each and every one of your valuable and continued support to JNNCE and JNNCE-AA. My sincere gratitude goes to Alumni Association office-bearers, various committee members and every alumni batch who has helped us organize this event; and also my esteem appreciation to our dedicated college administration, faculty and staff.

Enjoy the brief encounter and ignite the desire to promote solidarity among your batch mates. This is just the beginning of rekindling unity and camaraderie, and consolidating and strengthening the relationship for a better JNNCE and her Alumni community.

JNNCE is your Alma Mater Alma Mater...charge it with strong alumni power!

Dr. Sreepathi L K

Vice Principal

Vice Principal's Message

JNN College of Engineering has its deep roots in the field of Engineering education and I feel proud and privileged to become a member of this family. Our students have reached the greater heights as inspired by the motto "always aim high" and have illumined the name of the Alma Mater. The students come here with a great hope and vision and achieve their dreams. The aim of the college always has been to bring out the best in the students and make them better citizens. The college always tries to impart in the students the academic excellence, a sense of duty, discipline and above all moral and humanitarian values which are a need of the time.

I am certain about the fact that all our alumni are performing excellently in whatever field they are in. Many of them hold the key positions of major influence in the society; I would like to appreciate their efforts being done for the development of our society and justifying the years spent by them at this esteemed institution. I wish that our alumni never give up in life and earn fame, name and a promising career and come to us to tell the success stories and reward this institution with their achievements.

In the end, I would like to say that an institution's fame rests not only on its administration and teaching staff, but also on the achievements and developments of its students. We are extremely proud and fortunate that our alumni have been an important part of our institution and will always remain in our hearts forever. We seek their expertise in taking forward our institution to higher levels.

Infosys limited, Mysore

I am truly delighted to know that JNNCE, one of the prestigious technical institutions in the country is arranging the Alumni meet on 19th of May'18. At the outset, I wish good luck to all the concerned to host this event successfully.

Alumnus of any institute is a true ambassador for the institute. He/She represent the institute anywhere in the world – be it at work, home or society at large. The connection thus established with the institute will remain forever. Also they take a lot of pride in being called the alumnus of the institute. In line with this, the alumni of JNNCE who are spread across the geography, represent this great institute and uphold the image of the college in every part of the globe. I am sure they may be playing very critical role in their workplace, managing large part of the business, managing many people or even few may be part of another learning organization. However, it is important to remember that JNNCE has laid the foundation for their upcoming in professional career and share major part of their success.

From the college stand point, it is very apt to host events like alumni meet. This is one such occasion where the true brand ambassadors of the college come together, share their success stories, build the network and also guide the institute for its further elevation. This connect with alumni also helps JNNCE to narrow the gap that exist between academia and corporate world.

I am very happy to be part of this event planned on 19th May'18 and wish you all good luck

Dr. Manjunath. G R

Prof. & Head, Civil Engineering,
Atria Institute of Technology,
Batch : 1984

Message

It gives me immense pleasure to write this message being the very first batch out put of JNNCE. The name JNNCE always brings great sense of satisfaction and humbleness in all those who have studied/served it. I consider myself fortunate having got the opportunity to study and serve the great institute. I recollect my memory between 1980-84 when the institute was growing. The founder members Sri Nagappa Setty, Mr. Dinakar, Mr. Rajagopal Girmaji are the few names who brought up the institute with their hard effort and they need to be remembered for ever. One can rarely see such people who sacrifice every thing for institute/society. I remember the institute always stood for quality education to students and welfare of staff. It is rare to see both requirements being met by any institute/management now a days. Having grown exponentially, I wish JNNCE to reach a new pinnacle in world map of education.

Being a part of the distinguished and glorious alumni of “JNNCE” has always been a proud moment for me.

As we all know that a college's reputation is derived from its faculty and yes also the alumni of the college. The alumni who were once the budding engineers of the institution have now made an impact all over the world. Their extreme hardworking nature and talent which they have embedded in themselves over the years is now being recognised around the globe. From battling through the struggling phase and powering through it to become an overnight success is a habit of the alumni family.

Being a socially active and responsible alumni whenever possible I try to connect with our seniors as well as juniors and when I get to know their phenomenal achievements the joy of being a part of JNNCE multiplies.

The alumni meet gives us an opportunity for reliving our days of college. By the means of this grand event I want a huge mass participation which would let us to know each other further, time for new relations to develop which would be fruitful for all of us and help us prosper more efficiently in our fields of work by joining hands together in the path to making our lives a legacy worth remembering for our teachers, friends and family.

Join JNNCEAA - Ignite YOUR IDEAS here...

led by students, nurtured by faculty and powered by alumni.
Together, we can create great future.

Alumni associations aren't just like any organizations, they rely heavily on involvement of former students. Every alumni association is different, so here are just a few of the many reasons to consider joining yours JNNCEAA & make the difference.

1. Networking opportunities : It supports a network of former graduates who will, in turn, help to raise the profile of the college. Just like most other college student organizations, alumni associations aim to bring together like-minded individuals, fraternities. Alumni programs are open to all graduates and offer a broader networking scope.

2. Career building tools : One of the things to remember about alumni associations is that they want you to succeed. Of course, they're hoping that you'll use your success to help the association and college, but successful graduates are any college's best asset. It's no surprise that most alumni associations offer a variety of career services. These can be anything from the aforementioned job fairs to things like resume workshops, job postings, and online resources for job-seekers. And most of these services are offered free of charge to alumni members. Remember the mentor programs we mentioned here, These can be great tools for building your career or finding ways to maximize your earning potential.

3. Benefits : But alumni associations aren't just about jobs and recruiting new students. When you were a student at your college, you were part of a community that offered all sorts of exciting perks – free concerts, student discounts, poetry readings, art exhibits, library access, sporting events, and numerous other things that made your college unique and dynamic. And college alumni associations understand that even after graduation, many students continue to feel connected to their college, or associate a part of their identity with the institution.

4. Give back : Whether you know it or not, your college alumni association was probably instrumental in your success, and while most colleges hope that their students' successes post-graduation will promote the college reputation and encourage others to consider higher education, one of the main purposes of alumni associations is to recruit new students. Many colleges with aspiring international programs depend on their alumni to spread the word, and alumni recommendations carry a lot of weight with prospective students. So whether you sign up for membership, send a generous donation, or offer to serve as a mentor, there are many ways that your alumni association will help you help your college.

Over the past 15-20 years many dedicated people have worked hard in leadership roles to keep the JNNCE Alumni Association an outstanding organization. Since the Alumni Association was established back somewhere in 1990's, the hope has been that more alumni would get involved in leadership roles, but that has not happened. Currently, many thanks to the special interest taken by our college principal Dr H R Mahadevaswamy & his team along with the great support from our parent organization, management of National Education Society for conducting this JNNCEAA-Global Alumni Meet.

Sunil M D

Asst. Professor, E & C Dept

Batch : 2001

As a graduate, we represent much of all that is good and great about the Institution – our past accomplishments, our future achievements, the way in which we live, and the values by which we live will reflect upon the educational values of JNNCE.

Consequently, much of what the public will read, hear, think and believe about our Alma Mater will largely be based upon the actions and good deeds of graduates like us.

From the day we graduated, we have been called upon to take on a new role. I am very fortunate that I was “called upon” to take the role of a teacher. Today JNNCE is my second home. And over the years I have realized that the one who is not happy in JNNCE cannot be happy anywhere else.

For others the role could be different when they are “called upon”. For example, they might have been called upon to host internships or mentor students in the college, and help a current student get valuable and much needed practical work experience in their field of study. Or, they might have been called upon to serve as an Ambassador for the Institution, through their professional contacts and network - to communicate with public officials about the importance of support for this great Institution – and provide a very credible and empowered voice of support – the type of voice to which alumni and distinguished graduates can effectively offer, and which public servants will listen to.

To be able to truly serve our alma mater we may consider accomplishing the following three tasks.

First, display our degree with pride. Let us display it in our home, our office or other highly visible area. Let us be proud and let our friends, our family and co-workers know of our University and JNNCE connection.

Second, recruit a new student to JNNCE, and help continue a trend of record setting enrollment. The College will continue to enjoy a reputation for academic excellence with a student body which is intelligent; known as “hard working”; is motivated, and which comes from diverse backgrounds. We know what it takes to succeed here, so let us recruit a new student to JNNCE.

And third, make a gift in support of the University...this is one instance where our personal/professional might come in.

And Best wishes to JNNCE and JNNCE-AA!

Message

I completed my B.E in Telecommunication Engineering from JNNCE in 2009. I was a nerdy student, well good in both studies and my extra-curricular activities. I was placed in TCS in my final year of B.E. However, my passion was always towards teaching and research. I refrained from TCS and joined JNNCE as a faculty in 2009 and served till 2016. For me it's a journey of 11 (4+7) years at JNNCE, and has gone through that transition of being a student and a colleague to my teachers and obviously my experience will be very different from others. JNNCE has a non-profit service oriented vibe that comes from the teachers and committee that comprises of freedom fighters and their sacrifices. Students studying at JNNCE will get that charm too and I have experienced it. Today, I have dedicated myself to research and development, which is a self-less service to the society and mankind, and of course for this JNNCE is always a source of inspiration and a first career building step in my life!!!. I will be always grateful to the JNNCE and NES fraternity.

A Stronger JNNCE Alumni Network for Stronger Brand JNNCE

Sumant Parimal, JNNCE E&E Batch 1993

Founding Partner and Chief Analyst, Innogress (www.innogress.com)

When JNNCE (Jawaharlal Nehru National College of Engineering) was formed at Shimoga during early 1980s, the spirit of founders were to provide higher technical education to the students coming across the country and in turn prepare engineers for future needs of our country and society. However came 1993, it was the same year when I graduated from JNNCE, Indian economy got opened for Multinationals Companies (MNCs) and for international trades and India became a market place for many of these MNCs. Subsequently everything became a market be it Indian people, Indian families, Indian establishments, Indian students, also Indian engineers and engineering colleges. Most of institutions and professionals of India first time got exposed to 'Open Market Economy' which works on factors like survival of the best, then comes importance of Branding which ensures that one gets best label in the market leading to best valuation when comes to sourcing or hiring decisions. So graduating from a professional colleges like JNNCE didn't remain the same what we used to see during 80s-90s. Now professional colleges like JNNCE and its graduates are like a brand, we can call it as 'Brand JNNCE'.

When it comes to 'Brand JNNCE', we at JNNCE should every time think in our acts and decision making whether we are acting for enhancing our brand equity through our actions or not. Daily we have to enhance brand equity of 'Brand JNNCE' and that's how one day we can build a world class 'Brand JNNCE' on national and international forums.

When it comes to Brand Building, while JNNCE Students and faculties are going to build that brand mostly through their internal acts like quality value based professional educations, applied research and thought leadership, but It's the Alumni who have larger interface with external World, Industry and Markets. So It's the JNNCE Alumni who are bigger Brand Ambassadors for 'Brand JNNCE', and these Brand Ambassadors can't be left unorganized, unaddressed, unrecognized, unutilized, & unconnected from its Alma Mater, JNNCE. So we need to have "A Stronger JNNCE Alumni Network for Stronger Brand JNNCE", a network which is multi-tier, self-expanding, self-engaging, value delivering and accommodating all JNNCE Alumni as one family under one vision and one brand.

As per one estimate, if a stronger, vibrant, inclusive and responsive JNNCE Alumni networks are being built, then over the years it can add a value worth Rs. 100 Crores in the kitty of 'Brand JNNCE', not including additional value added to each JNNCE Alumni in terms of better business, social & career building opportunities they get by accessing this growing JNNCE Alumni networks.

I am happy to note that, JNNCE Management has realized Importance of JNNCE Alumni networking, and established an umbrella Alumni Organization known as 'JNNCEAA' at Shimoga as Global association for JNNCE Alumni and JNNCE Family. Under this umbrella organization, various regional chapters like NCR Delhi, Mumbai, Chennai, Bangalore, Hyderabad, West Coast-USA, East Coast-USA are under process of establishment. NCR Delhi Chapter already organized several Alumni meets for North India/East India based JNNCE Alumni at New Delhi including last year Delhi Alumni meet which happened on 09th June 2017, and got fantastic success and support by JNNCE Management, Faculties and Alumni.

This year Global Alumni meet is planned on 19th May 2018 at JNNCE, Shimoga Campus, I wish all success to this extraordinary Global Alumni meet, and may this event establish better collaborations between Globally spread Alumni of JNNCE and JNNCE Campus and its students to deliver value to every stakeholder of our Alma Mater.

Plunge into the Corporate World

Vinay Kaul, GMITE (IIMB); MBA; M.Tech

Kaul.vinay@yahoo.com

Principle Lead & Advisor, WW ISV & OEM, Oracle India Pvt. Ltd., Bangalore

Batch : 2004

This article is aimed at every single individual who is going to plunge into the corporate life one or the other day after completing his or her education. In today's era of extreme competition, it is very important that an individual understands what is required for them to sustain in their professional life, and maintain a good balance between their personal and professional life.

I have been a part of the corporate world for the last 10 years now and survived several layoffs, not because I was only hard working or smart one, instead, I was always on my toes and kept my eyes and ears wide open.

In this article, I would like to highlight a few of the things that I learnt over time, which in turn helped me sustain in my profession until this moment. I am hopeful that my readers would find this useful, and should anyone of my readers need some advice/guidance, I would be happy to help them.

Things that Helped me Sustain my Place in this Competitive World Over The Last Decade :

1. Consider every day of the quarter as the **LAST DAY** of the quarter. If you do so, you will never feel the pressure mounting on you. Bit stressful, but this would certainly give you an edge over the others in the end.
2. Everything in life starts with **SALES**, be it interview room during your campus selection or be it in the boardroom. Either you are trying to sell your qualities as the best candidate trying to convince the panel why you should be given that job or to your management/peers convincing them that why your idea should be adopted.
3. Communication is the **KEY**, which will either **Make You or Break You**.
4. Sitting at the Helm of the Ship, i.e. have the appetite to take risks. Remember, only the risk-takers can survive the toughest times. Don't worry about the result, even if you fail, remember that there are people around you, who would still notice your efforts.
5. Love what You Do. Don't perform your job just for the sake of doing, instead do it with the feeling that no one else can do it better than You.
6. Invest in People, and **NOT** just in Ideas. This is extremely important if you are a manager. Remember being a manager as well, you must **NEVER** forget that you started your career as an Individual contributor. While you create a path for yourself to move up in the organization you work for, make every single attempt to pull your team UP.

Religion

Disappointment today has found its way into the minds of the young. When one doesn't get what one expects it leads to an agitated state of mind, the root cause being disappointment. Whining and sulking is what people usually do in disappointment but are unable to understand that what they have been rewarded is what destiny has given to them. The role of destiny in the success of any person is significant. One cannot go against destiny so the best thing to do is to accept the situation rather than fighting against it. Destiny will take you to your destination and by accepting your destiny, you can avoid disappointment. Often what helps faith!

Being spiritual and being religious are two different practices. Most of us take religion for spirituality, which is wrong. Religion could be considered as a way or a path followed in worshipping the supreme. Most of the wrong practices in our society is the result of ignorance and the incapability of understanding the difference between religion and spirituality.

Some of us are so orthodox that we do not like to accept our near ones following a religion to which we do not belong to.... We must understand that choosing a religion is merely choosing a path. We have absolutely no right to impose our thoughts and beliefs on people who don't believe in them.

A difference between communities in the name of religion only shows how ignorant they are. The lack of a basic understanding of spirituality is evident through such cases. We think of people as 'traitors' and tag them a 'disrespectful' when they decide to follow a certain path not ours. The lack of acceptance is well established through this fact. We are brothers and it is our duty to respect and accept the path, which they have chosen to follow.

Sandeep Sinha

BE (Civil), Batch: 1994

Success Story

I joined the under grad programme in 1990, Electronics and Communication Engineering at prestigious JNNCE. This institution founded and managed by freedom fighters occupies a special place in this part of Karnataka as a reputed center of learning and research and also been a national pride having attracted students from all over India since its inception. Fond memories of my discussions with teachers whose passionate lectures inspired me to work hard. I should say, I was hand held in my studies at JNNCE right through all my years at UG, PG and PhD studies and the pleasure the teachers and staff in the labs derived to help the students. I remember, I would follow my teachers even to their homes to clear my doubts. I wish to boast as my teacher's pet student even to this day. I owe all my success, for the qualities I have imbibed at JNNCE i.e., hard work, simplicity, dedication, sound technical knowledge, dealing with people and transparency. Some of the memories I treasure, being a student of B.E., M.Tech. and PhD and faculty at JNNCE, teachers and staff at JNNCE saying "JNNCE is Lucy's second Thavarumane (Mother's house)" and memories of our student group "Gangue" and the trips I enjoyed.

NumberNagar® - Learn it right the first time

Co-Founder & CEO; A Student of Vipassana

Batch :1993

It is a great honour to represent JNNCE's 1989-1993 Batch. We feel so delighted and humbled to meet our batchmates and friends from those days to celebrate this special occasion of Global Alumni Meet.

As we reflect upon the 4-years journey that we had finished at JNNCE, we feel proud to be a part of this blessed fraternity, JNNCE family who gave us all the opportunity to master our skills, develop our knowledge and improve our attitude in leadership and outlook in life.

It was the year 1985, we had begun our journey in this prestigious institution. We had to overcome significant challenges, but the institution believed that we could make the most difference, and it was a great success.

I would like to specially highlight that, this environment of JNNCE turned out as the potters and we stood as mere clay and we were wonderfully shaped into fine pieces of art work. The shaping process was hard and long. Our knowledge and skills were stretched and tested at many points. But in all those stretching, pulling and shaping process, the only aim of this institution as a whole was committed for making us what we are and the result is that we're already learning to adapt the knowledge and understandings that we've picked up to actual problems and issues that are confronting the public pertaining to their health.

So I would like to applaud and humbly thank our institution as a whole. We believe that all this was made possible through the effective learning environment of our college under the leadership of very learned administrators and staff. With great admiration I want to salute them, who were not just a person, but the perfect leaders and mentors who represented a vote of confidence in each of us. It goes beyond saying that completing the course in this environment will provide an enormous benefit to all the students, expanding and strengthening our capabilities and equipping us with the skills to take the next steps in our careers. Thank you JNNCE for making us strong enough to face the real world as we started our journeys as the custodians of engineering profession.

Teachers can have a tremendous influence on student's attitudes. As we think of our class co-coordinators and teachers this becomes true. They molded us by sharing their valuable knowledge and experience and helped us in developing our skills as engineers. The biggest thanks we owe however is to all of them for the faith they had in us and backing us in every way possible to develop ourselves to our best possibilities. Best of all, this part of the experience will continue throughout our careers as we refine and develop our knowledge and understanding of what it means to be an effective nurse wherever we are.

College days are always the best days of our life. They gift most of us with some unforgettable memories to cherish forever. The friends we made, the days we spend together, and the moments shared are priceless. Our Student activities at various levels, most memorably and most importantly, gave each of us the opportunity to participate in countless hours of high quality activities with fellow students, facilitators and friends. We have really been missing them all!

We all experienced that, we got the best in our institution. Keeping that in mind, we promise to our alma mater that we will always uphold the dignity of our profession, wherever we go and whatever we do, letting our light shine.

Dear fellow alumni, always remember that a college degree is not a sign that we are finished products, it is actually an indication that we are now prepared for our life, always think that the greatest stars are those who shine for the benefit of others and always keep in mind that EXCELLENCE IS NEVER AN ACCIDENT. It is always a result of high intention! Sincere efforts! Intelligent direction! Skillful execution and ability to see obstacles as opportunities always!

Dr. Surendra S

Professor & HOD, E & E Dept., JNNCE

Batch : 1989

I am honored to be invited to share with you all on this most important occasion, representing BE (E & E) students of 1985-1989 batch, our sincere gratitude to all and also to lovingly embrace those sweet memories which enabled us to make this day possible like this. We are very happy that you are all here to share in this celebration of the accomplishments and unique qualities of the members of our batch.

As a graduate engineer who successfully completed four years of education in engineering, I feel a huge sense of pride and achievement right now and I would like all of my fellow graduates to cast your minds back to day one of JNNCE's adventure.

As quoted by John F Kennedy, "we must find time to stop and thank all the people who made a difference in our life".

"College is something you complete, life is something you experience. Success is defined in myriad ways and you will find that through so many people as you progress in your life journey. We are grateful to the management of JNNCE for giving us the opportunity to find this success through the experiences we gained from here.

As rightly said by Dr. A.P.J. Abdul Kalam, "difficulties in your life do not come to destroy you, but to help you realize your hidden potentials and power, let difficulties know that you too are difficult".

Looking back helps us to gather lot of memories. Our days were not very easy and we tried each day to cope up with its tough schedules and demands. But in all these, the most important thing we learned was striving for excellence with hard work and passion for engineering realizing the value of being an engineer. Each and every one of us who graduated from this institution has had to struggle, sacrifice and compromise in order to succeed and each of us has taken something individual from our time at JNNCE. I have had many opportunities for personal and professional growth and I have been encouraged out of my comfort zone many times. We all had wonderful support network of people around us, without whom our degree wouldn't have been possible.

"Let us be grateful to the people who made us happy, they are the charming gardeners who make our souls blossom – says Marcel Proust".

A person of infinite value has the ability to make a profound difference in the lives of others, who gives most profoundly positive impact in those around him by the examples he sets. We are grateful to God for giving us teachers and mentors who knew the strength and needs of the students and helped us and gave us meaningful opportunity for our professional development and instilled in us a passion for engineering as a profession.

"Education is an excellent tool, if used properly, and if we are focused on a goal. Here to achieve our goal we had our class teachers and mentors during those 4 yrs. All of them toiled unselfishly, sharing their time, energy, talent and knowledge with us. With an open heart they were ever loving and supportive to all of us and helped us to bring out the best in us.

We can never forget the help we enjoyed from the non-teaching staff who were always ready to extend their support and helping hand which made our journey an easy one. A day came where we had to be away from our family and friends to join this family of JNNCE with fears and tears. And our stay in the hostel was made homely by our loving wardens by their care in all through our stay in the hostel.

Apart from our academic activities in the class room, we were enriched with loads of co-curricular and extra-curricular, as well as practical and industrial exposure.

Many of us realize that learning is social: we learn more when we learn together, when we exchange ideas and stimulate each other's thinking– and this is the way many people find learning together most rewarding. Here we remember the competitions and activities which placed new challenges to learn new things, to develop our talents and potentials. Those activities gave us an opportunity to explore ourselves and boosted our morale in so many ways.

At this time we fondly remember our parents, guardians and all our well-wishers who supported us in all we did. Your love, guidance, encouragement and nurturing care made this day possible.

We feel proud and honored for having studied in this prestigious college, which equipped us and trained us as professional engineers.

As we all continue in our life, let us take with confidence knowing that we have achieved great heights and we are equipped with necessary tools to tackle our future in our profession; and we promise to be true to our ALMA MATER to serve the humanity.

It is indeed a great pleasure and an honor to be a part of Global Alumni Meet, being hosted by our alma mater – JNNCE! There are so many memories that come back to me when I recall my graduate years here at JNNCE that it will be impossible to make justice to all of them through my brief remarks, so I ask your forgiveness in advance for all that is left unsaid and I hope you will be happy with the shortness of these remarks!

JNNCE became a home away from home when in 2004 I left my native place Bangalore, to come and study here for my engineering degree. That first year was one of the richest learning experiences in my whole life – learning a new place, new people, a new university, a new profession. In my experience, JNNCE is the finest example of expanding educational horizons, 'excellence in action'. JNNCE offers a wealth of learning opportunities, and provides the best that the Indian technical education can offer to a student, and to the outside students a sense of the uniquely warm *Malnad* set of values and culture.

The new college had so much to offer and it was going to make possible a dream – the dream of becoming a better professional. I had benefited from using libraries and other learning facilities. Graduate college life is among the good things in life! The good things in life can easily be taken for granted and neglected. I hope we can all share the responsibility of not being taken for granted, of actively engaging in demonstrating our value, of making sure that we COUNT!

To paraphrase a popular saying 'I COUNT, therefore I am!'

Irfan Khan

Asst. Professor, Civil Engg., Dept., JNNCE
Batch : 2008

I would like to offer my congratulations to all of you – former and present JNNCEans for your fruitful association with this great institution.

One of the reasons I am proud and confident that we achieve our professional goals is something I have in common with all of you – a wonderful and fruitful association with JNNCE.

I firmly believe that the greatest thing that we can do for ourselves throughout life is to educate ourselves. Only then can we advance and truly become people of the world. By moving up in our studies, as all of us are, we move closer to becoming active contributors to a better world.

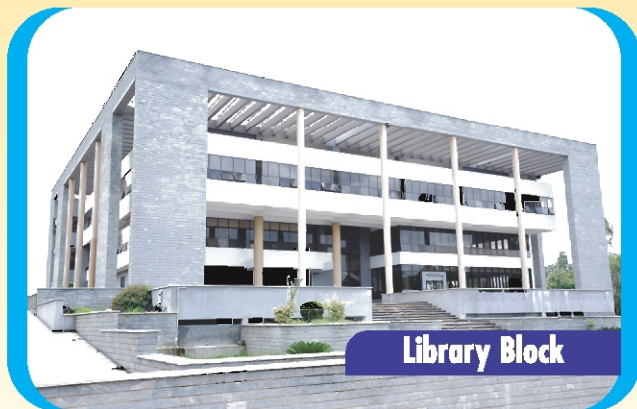

But first, I want to talk to you about how fortunate you are to have been students at JNNCE. JNNCE is unique. Its small and intimate environment allows the teachers to get to know each and every one of us close up and personally. At any other College, you would be just another face in a long parade of students going and coming. I believe that the real learning happens when you have the opportunity to get to know and develop a relationship with your teachers. JNNCE does a superb job at fostering that type of environment.

I am also very proud to say that I received the most well-rounded and extensive education here. Unlike other engineering colleges, JNNCE teachers place equal emphasis on all of the subjects. It will help you find and pursue your passions too. I call JNNCE special because it fosters growth and learning in an environment of respect and trust.

I want to further emphasize how JNNCE has prepared us for our futures. It does this by explicitly teaching you how to function well after you have left the school. In addition to academic subjects, the teachers pass on knowledge about how to be nice to others, how to form goals and stick to them, and how to foster a creative spirit that you can use to accomplish anything you want to do. I learned all three of those lessons at JNNCE. And those lessons enabled me to become a confident graduate engineer who was ready to take on the world.

Again to you my fellow JNNCE batch-mates and friends, congratulations! A chapter of our life has ended and a new one has begun. I am confident that our alma mater has truly prepared us to succeed. But what JNNCE has done is only a part of the story. Now it's our turn to follow through on everything we had learned."
