- MANTHAN is a completely AI-focused hackathon. Participants will work on real-world AI problem statements in the following domain:
 - Real-Time Predictive Analytics.

MANTHAN

RULES & REGULATIONS

PROBLEM STATEMENT:

- Problem statements will be provided on the spot at the beginning of the hackathon.
- Teams must develop their solution within the 24-hour hackathon duration based on the assigned problem statement.

EVALUATION PROCESS:

- The evaluation process consists of three stages: Preliminary Evaluation Round, Second Evaluation Round, and Final Evaluation Round.
- After the first two evaluation rounds, the jury panel will shortlist the Top 10 teams.
- Shortlisted teams will present their solutions in the Final Evaluation Round.
- Winners will be selected based on Innovation, Technical Implementation, Solution Impact, and Presentation Quality.

DEVELOPMENT & TECHNOLOGY RULES :

- Teams must develop their solution only during the hackathon duration completely predeveloped or previously submitted projects are strictly prohibited.
- Participants are free to use any programming language, framework, AI/ML tools, open-source libraries, APIs, Generative AI tools, and AI assistants.

SUBMISSION REQUIREMENTS :

- Teams must submit their source code, project presentation (PPT), project abstract description, and a demo video or live demonstration (if required).
 - Submission links and deadlines will be shared during the event.
-
