About the SDP

Quantitative Aptitude is the most important requisite for clearing any competitive exam. Quantitative Aptitude skills form the bulk of most of the graduate level papers. It is known that everybody has studied mathematics in their school days with a view to obtaining good marks at the end of the year. However, nobody ever thought it would become an obstacle in later life when you have to choose a profession.

Quantitative aptitude is an inseparable and an integral part of **aptitude** exams in India. It tests the **quantitative** skills along with logical and analytical skills. One can test their own number handling techniques and problems solving skills by solving these questions.

Almost all competitive examinations test the candidate for quantitative aptitude, where they drain the life out of you. your mental alertness. The business world is a ruthless one, complex challenges being part of the routine. Also, a business concern needs to keep an eye on the competitor and stay a step ahead. For this to happen, a management executive needs to be mentally alert to the changes happening around him/her. A person having an aptitude for numbers, will invariably have a sharp mind.
