Event Category : Seminar

Event Name: " Web Page development and
                            database connectivity"

Date: 16th   December 2021.

National Education Society (R.)

J N N College of Engineering, Shivamogga

(Approved by AICTE, New Delhi, Certified by UGC 2f & 12B, Accredited by NAAC – 'B',
UG Programs: CE, ME, EEE, ECE, CSE, ISE, TCE accredited by NBA: 1.7.2019 to 30.6.2022,
Recognized by Govt. of Karnataka and Affiliated to VTU, Belagavi)

Department of Information Science and Engineering

Date: 11-12-2021

Circular

All the students of 5th Semester are informed to attend seminar on " Seminar on Web Page development and Database" scheduled on 16-12-2021.

Objectives:

1. Understanding the concepts of Web Page – HTML, CSS, Java Scripts.

2. Use of Back-end concepts – PHP, MySQL.

Resource Person: Mr. Arun Kumar P, Asst. Prof. Dept. Of ISE

Report on Seminar:

The main goal of this seminar is to carry out the Mini-Project work for the 5th Semester students under DBMS. The session was focused on building a Web page related to:

➢ **Front-end concepts:**
    1. HTML (Hyper Text Markup Language): HTML is the standard mark-up language for creating Web pages, that describes the structure of a Web page.

    2. CSS (Cascading Style Sheets):CSS describes how HTML elements are to be displayed on screen, paper, or in other media. It can control the layout of multiple web pages all at once.

    3. JavaScript: JavaScript is a lightweight, cross-platform and interpreted scripting language. It is well-known for the development of web pages; many non-browser environments also use it.

➢ **Back-end Concepts:**
    1. PHP: The term PHP is an acronym for **PHP: Hypertext Pre-processor**. PHP is a server-side scripting language designed specifically for web development. PHP can be easily embedded in HTML files and HTML codes can also be written in a PHP file.
    2. MySQL: MySQL server is an open-source relational database management system which is a major support for web-based applications. Databases and related tables are the main component of many websites and applications as the data is stored and exchanged over the web. For all these reasons, MySQL server becomes the default choice for web applications.

Followed by demonstration of usage of XAMPP stack has been delivered in the talk. XAMPP is a cross-platform software, which stands for Cross-platform(X), Apache server (A), MySQL (M), PHP (P), Perl (P). XAMPP is a complete software package, so, we don't need to install all these separately.

More than 50 students attended the session and ended with building a Simple Login page using HTML for view, CSS for improving the styles, JavaScript for frontend validation, PHP for business-logic and connectivity with MySQL open-source RDBMS server has been demonstrated in XAMPP.
